

Spaces without walls

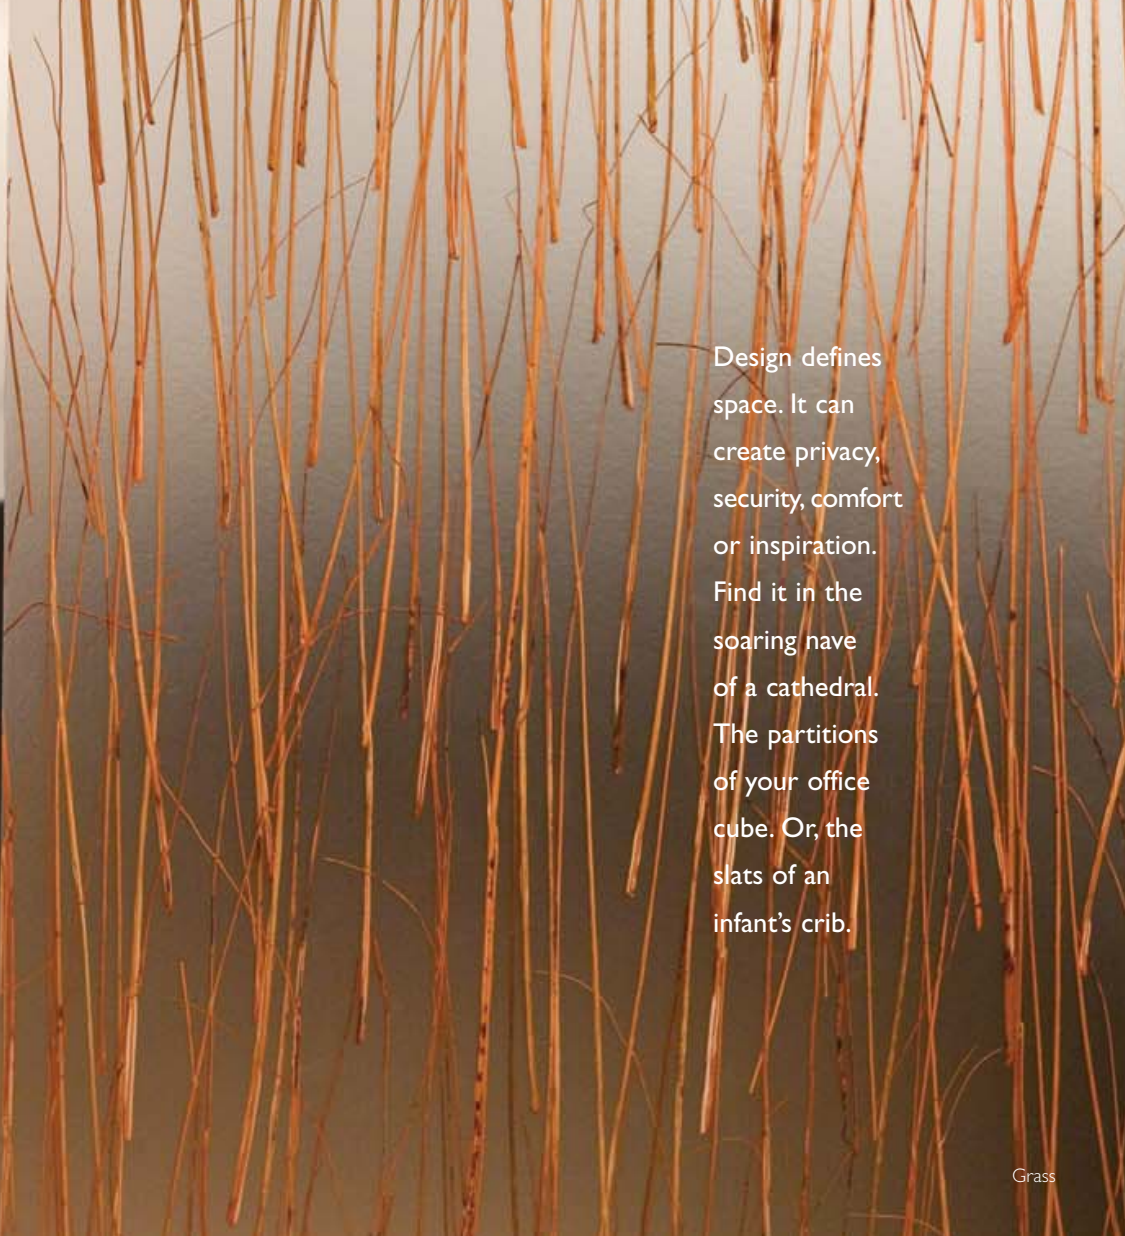

Defined by Definitions™ Decorative Interior Accents

Your ideas become reality

www.armstrong.com/definitions

Design defines space. It can create privacy, security, comfort or inspiration. Find it in the soaring nave of a cathedral. The partitions of your office cube. Or, the slats of an infant's crib.

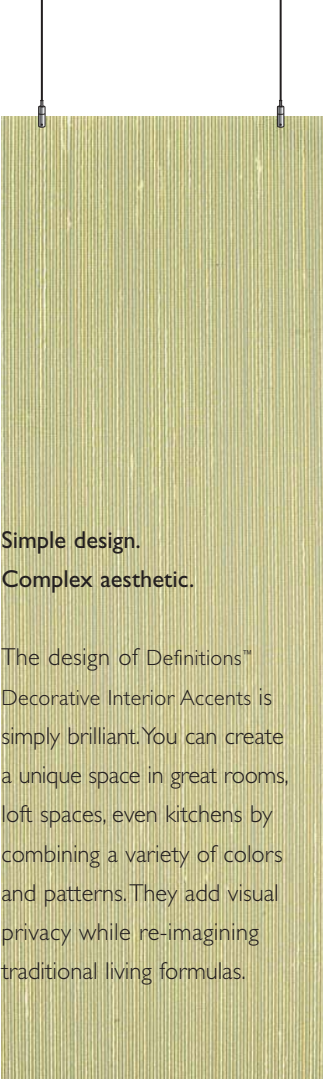

Architectural. Practical. Personal.

Definitions™ Decorative Interior Accents define spaces through the creative placement of free-hanging decorative panels. They're a logical choice in open plan loft designs. But, they're equally at home in traditional family rooms, master suites or media centers.

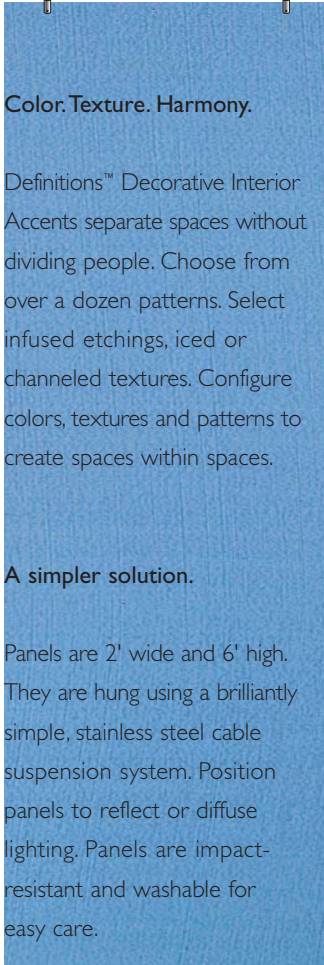

Simple design.

Complex aesthetic.

The design of Definitions™
Decorative Interior Accents is
simply brilliant. You can create
a unique space in great rooms,
loft spaces, even kitchens by
combining a variety of colors
and patterns. They add visual
privacy while re-imagining
traditional living formulas.

Color. Texture. Harmony.

Definitions™ Decorative Interior Accents separate spaces without dividing people. Choose from over a dozen patterns. Select infused etchings, iced or channeled textures. Configure colors, textures and patterns to create spaces within spaces.

A simpler solution.

Panels are 2' wide and 6' high. They are hung using a brilliantly simple, stainless steel cable suspension system. Position panels to reflect or diffuse lighting. Panels are impact-resistant and washable for easy care.

Crimson

Create inner space.

Definitions™ Decorative Interior Accents defined

- Dimensionally-stable PETG construction
- 2'x6' panel sizes
- Hang individually or in groups
- Suspend from ceiling or plenum with simple cabling kit
- Lighting can enhance dramatic effect
- Wash with gentle, non-abrasive cleaner
- Fast, simple, flexible installation

Ceiling-Mounted Cable System (set of two)

Suspend panels from ceiling using these ceiling mounts. Attach free-hanging panels from top.

Floor-Mounted Cable System (set of two)

Anchored to both ceiling and floor for maximum stability. Attach panels using Panel Side Clamps.

Panel Side Clamps (set of three)

Side clamps anchor panels to cabling or to each other to create more dimensional stability.
